Boris Neyman

New Business

Mark Rom requests that membership subscriptions are due. Please see you get them in as soon as possible.

Good of the Order

Joe Cenzori asked all attendees to help support the Western Reserve Code Academy. Joe also expressed Jerry Gerbers recommendations to make note to the Chief Building Official and the Master Plans Examiner that it is a code requirement that available fault current be present on all approved plans. Hopefully this will correct the situation that we are coming across in the field at this time.

Old Business

Due to the restrictions opposed from Chapter one of the Ohio Building Code, inspectors are required to follow only what is on the approved plans. It is suggested if the available fault current is not present on the approved plans; the inspector should approve the inspection regardless. If the plans have been approved, the inspector does not carry the authority to stray from them. The inspector then should make note to the Chief Building Official and the Master Plans Examiner that it is a code requirement that available fault current must be present on all approved plans. Hopefully this will correct the situation that we are coming across in the field at this time.

Education

Joe Cenzori gave instruction on Box fill, Wireway fill as well as a presentation on Wind Turbine failures and Copper thefts.

Western Reserve Division Code Academy

STILL TIME TO ATTEND!!

Has started a 30 hour 2011 NEC course
in the
Parma Fire Training facility

7914 Day Drive
Parma, Ohio 44129
